Preliminary Amendment: ABSTRACT AMENDMENTS

On page 23, please amend the paragraph as follows:

In <u>conventional</u> aircraft cargo compartments (2) panels or similar flat floor elements (51) are fastened to floor beams (16) or similar supporting elements that are installed in the body of the aircraft. Subsequently functional units such as roller elements (11), latches (13) or PDUs (14) are mounted and connected to one another by way of appropriate control conductors. In the present invention To simplify assembly and to reduce the likelihood of errors during assembly it is proposed to fasten the floor elements (51) permanently to the supporting beams elements (16) so as to form prefabricated floor modules (50), and to install these floor modules (50) in the aircraft.
